

Cleaner & Safer Water For Your Entire Home

MASTER FILTER

Victory Choice

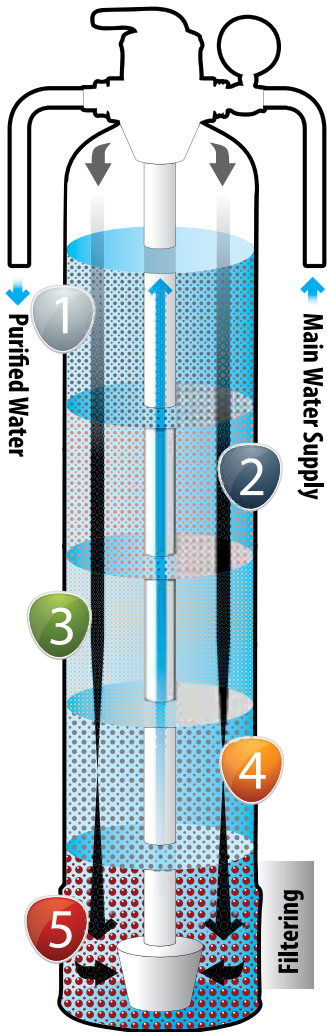

Make The Right Choice.

MASTER FILTER

At Victory Choice, our focus is to provide a healthy lifestyle for everyone.

With over a decade of experience in the water purification industry, we are committed to offer filtered water solutions and unsurpassed service that you deserve.

Our Master Filter system uses a five stage purification process that enables most of the water's unwanted sediments and chemicals to be removed, ensuring water entering into your house is cleaner and safer.

1 Stage One: Activated Carbon

Activated Carbon traps sediments such as dirt and sand while removing some of the chlorine in the water, leaving 10% to 25% of chlorine in the water. This helps in preventing bacteria from spreading in the water tank.

2 Stage Two: Zeolite Sand

Zeolite Sand is ideal for use in domestic and industrial water filtration due to its high density and toughness. It efficiently removes large particles such as mud and suspended solids in the water.

3 Stage Three: Fine Sand

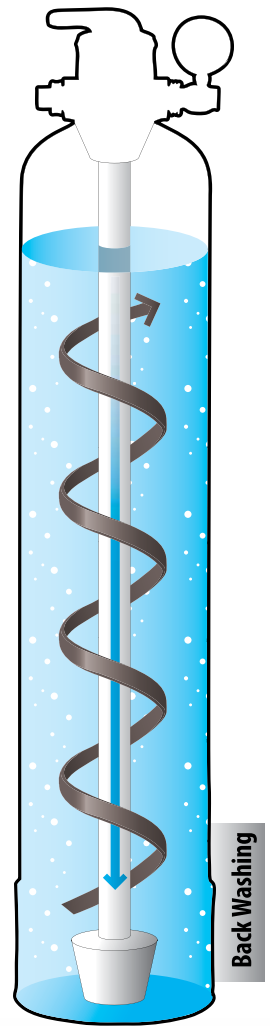

Fine sand further traps very fine sediments down to nominal microns.

4 Stage Four: Fine Gravel

Fine Gravel removes dirt and removes bacteria to prevent diseases such as typhoid, cholera, bihdryia and amoeba.

5 Stage Five: Coarse Gravel

Coarse Gravel provides is the bottom stage of the filtering process and provides "support" to balance the ph level and to increase oxygen content and to restore the water quality.

***10 Years Warranty On Fiberglass Tank**

1 Year Warranty On Multiport Valve

FREE Installation

Purified Water | Crystal Clean

Backwash Water | Dirty and Mucky
